Sir/Madam:

Please quote your government price/s including delivery charges, VAT or other applicable taxes, and other incidental expenses for the goods listed in **Annex A**. Failure to indicate **TECHNICAL SPECIFICATIONS** could be basis for non – compliance. Also, furnish us with the descriptive brochures, catalogues, literatures and/or samples, if applicable.

If you are the exclusive manufacturer, distributor or agent in the Philippines for the goods listed in Annex A please attach in your quotation a duly notarized certification to this effect.

Please submit this form together with Annex A to DSWD FO IX BAC OFFICE on or before

August 07, 2023 @ 05:00 pm

Very truly yours,

ROLANDO V. CUEVA

Regional Procurement Officer

GENERAL NOTES

FOR OLD WALLS WITH HAIRLINE CRACKS AND OLD PAINT.
Scrape off loose or flaking paint from wall. Sand surface with grit 80 or 120. For cracks larger than 2mm, you may apply wall putty or cement plaster. Apply 1 coat of Primer Multi-Seal vertically. Let dry for 1 to 2 hours. Apply second coat horizontally.

For severe cracks on walls used a waterproofing fiber cloth immediately after the first coat while it is wet. Dab cloth with brush onto wet sealant and smoothen before it dries, pushing air bubbles out from fiber cloth. Let dry then apply second coat or third coat if necessary.

FOR WATERPROOFING.
Make sure that surface is dry and free from dirt and dust. Apply 1 coat on corners and edges. Let dry for 2 hours. Apply second coat vertically and let dry overnight. You may apply third coat if area is subject to heavy load.

ELASTOMERIC WATERPROOFING
Application: All surfaces must be clean, dry and free from dirt, grease and dust.
For large cracks or holes, use waterproofing cloth to bridge gaps.
